They are based on toxicology information available for each hazardous ingredient and are consistent with the product type and the likelihood of a specific route of exposure. Known chronic health effects related to exposure to a specific ingredient are indicated.

**Acute Health Effects:**

**Inhalation:** Unlikely to occur due to the physical properties of the product.

**Skin Contact:** Repeated or prolonged exposure may cause irritation or sensitization dermatitis in previously exposed individuals

**Eye Contact:** May cause irritation.

**Ingestion:** May cause gastrointestinal irritation with nausea, vomiting, and diarrhea.

**Chronic Health Effects:** None Known

**Medical Conditions Recognized as Being Aggravated By Exposure:** Pre-existing conditions.

### Section IV: Emergency First Aid Procedures

**Inhalation:** Not likely to occur for finished product. For molten system, move into a well ventilated area..

**Skin Contact:** Rinse affected area with mild soap and water until no evidence of product remains. Discontinue exposure. Get medical attention if irritation persists.

**Eye Contact:** Immediately rinse eyes with copious amounts of warm water, occasionally lifting upper and lower lids until no evidence of product remains. Get medical attention if irritation persists.

**Ingestion:** Treat symptomatically. Maintain airway and respiration. If vomiting occurs, keep head below hips to prevent aspiration. Dilution by rinsing the mouth and giving water or milk is generally recommended. If unconscious, the victim should not be given anything to drink. Contact physician or local poison control center.

### Section V: Fire Fighting Measures

**Flammability Classification:** Level 0

**Flash point:** >200 deg COC

**Flammable limit (% Vol. in air):**

### Section VIII: Exposure Controls, Personal Protection

**Respiratory Protection:** Air contamination monitoring should be carried out when the generation of dust or aerosols is likely to occur, to assure that the employees are not exposed to harmful concentrations exceeding exposure limits. If respiratory protection is required, it must be based on the contamination levels found in the workplace, must not exceed the working limits of the respirator and by jointly approved by NIOSH and MSHA.

**Protective Gloves:**

Chemical resistant gloves should be worn where repeated or prolonged skin contact may occur.

**Eye Protection:**

Safety glasses are not generally required during normal use conditions, unless there is a possibility of eye contact.
